

Professionalism and Interpersonal and Communication Skills . . . We have long thought that these were congenital qualities of successful physicians, but now we see them as teachable, learnable, and measurable knowledge, skills, and attitudes. Elizabeth Rider superbly amplifies the nuances of education and evaluation of these essential physician competencies.

– F. Daniel Duffy, MD, American Board of Internal Medicine

A Practical Guide to Teaching and Assessing the ACGME Core Competencies

Authored by: Elizabeth A. Rider, MSW, MD, FAAP, Ruth H. Nawotniak, MS, CTAGME, and Gary D. Smith, EdD

Competency teaching, assessment, and documentation help, all in one place

The ACGME requires residency program directors and coordinators to document and assess resident competence in six areas: patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice.

Initially developed for residency programs, the ACGME competencies are being adopted by medical schools, regulatory organizations, and specialty and licensing boards.

How do you teach and evaluate core competencies in medical education?

HCPPro is proud to introduce ***A Practical Guide to Teaching and Assessing the ACGME Core Competencies***. This book and CD-ROM will be your survival guide to teaching, assessing and documenting the ACGME's six core competencies.

A Practical Guide to Teaching and Assessing the ACGME Core Competencies provides you with:

- Background, best practices, and the latest information about competency evaluation
- Tips for teaching, assessing and documenting each competency
- Sample tools, forms, and resources
- A step-by-step guide to teaching and assessment
- Strategies for documenting tough-to-assess competencies such as practice-based learning and improvement, systems-based practice, and professionalism
- A clear explanation of the ACGME core competency regulations
- A practical training guide to help medical education directors measure competence in each area
- An accompanying **CD-ROM** with adaptable forms, resources and glossary

Your own core competencies training resource

The standards set by the ACGME for the core competencies are raising the bar and changing graduate medical education at all levels.

This book compiles best practices and advice to help you teach, assess, and document the core competencies in medical education.

Who should read *A Practical Guide to Teaching and Assessing the ACGME Core Competencies*?

Medical education leaders at all levels – undergraduate, graduate, and post-graduate – including residency program directors, clerkship directors, medical school deans, graduate medical education directors and committee members, department chairs, teaching hospital faculty, medical staff members, residency program administrators and coordinators, designated institution officials, continuing medical education directors, and faculty development leaders.

About the authors

ELIZABETH RIDER, MSW, MD, FAAP, is director of programs for communication skills at the Stoeckle Center for Primary Care Innovation, Massachusetts General Hospital; director of faculty development for the Institute for Professionalism and Ethical Practice at Boston Children's Hospital; and assistant professor of pediatrics at Harvard Medical School. Board certified in both pediatrics and clinical social work, Dr. Rider is a fellow of the American Academy of Pediatrics and the American Academy on Communication in Healthcare. She is co-chair of the Medicine Academy of the National Academies of Practice and section editor (Reflective Practice) for the international journal *Patient Education and Counseling*. Dr. Rider practices at Roslindale Pediatric Associates in Boston.

RUTH H. NAWOTNIAK, MS, CTAGME, is the cofounder and first president of The National Board for Certification of Training Administrators of Graduate Medical Education (TAGME). She spearheaded the creation of TAGME to establish standards for the profession, acknowledge the expertise needed to successfully manage graduate medical education programs, and recognize those training program administrators who have achieved competence in all fields related to their profession. Nawotniak also serves as the residency program coordinator for the general surgery residency program at the University at Buffalo-SUNY in Buffalo, NY.

GARY D. SMITH, EdD, is the administrative director of medical education at John Peter Smith Hospital and University of North Texas Health Science Center in Fort Worth, TX. Smith has been involved in medical education for over 20 years and has extensive experience in the development, administration, and accreditation of teaching hospital and medical school programs.

Foreword by **F. Daniel Duffy, MD**, American Board of Internal Medicine

Introduction by **Sylvia R. Cruess, MD** and **Richard L. Cruess, MD**, Centre for Medical Education at McGill University

Concluding Comments by **William T. Branch, Jr., MD**, Emory University School of Medicine
